Break up large spaces into smaller cosy 'rooms' with a plywood room divider featuring round windows, so you can easily check on the little ones...

...We built ours from a simple sheet of plywood using a skillsaw to cut out the hole and then firmly securing it to the existing wall.

VROOM VROOM!

Storage boxes for toys can be turned into 'trucks' with a few small additions. Screw on small castor wheels underneath, glue on round wooden coasters and cut out shapes as the windscreen and grill, then add bicycle reflector lights. Paint a simple race track on the floor using a Resene testpot or spare paint from your project, complete with parking spaces for 'tidying up' and a parking sign for visitors only.
