

You will need:

- MDF kitset mug stand (ours came from 'Spotlight')
- Resene Art Action Quick Dry
- Resene testpots of Resene Bedazzle and Resene Rouge
- Paintbrushes
- PVA glue
- Sandpaper

Step one

Take the kitset pieces apart and lightly sand to remove any rough edges – you might need a grown up to help with this bit.

Step two

Fix the two main pieces of the stand together with PVA glue, as shown.

Step three

Fix the base pieces into position and also the 'arms' of the stand. Again, you might need a grown up to help with this. Let the glue dry for a few hours.

Step four

Paint the whole stand with one coat of Resene Quick Dry and allow to dry for two hours.

Step five

Paint the whole stand with two coats of Resene Rouge, allowing two hours for each coat to dry.

Step six

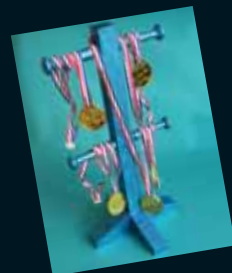

Paint the whole stand with two coats of Resene Bedazzle, allowing two hours for each coat to dry. Then get dazzling!

Turn a MDF mug stand into a sparkly jewellery holder using metallic paint from the Resene KidzColour range.

Top tip:

A kitset like this usually comes with instructions, so make sure you read them before you start putting it together.

Here's another idea:

Make this cool medal holder using a base coat of Resene Optimist and topcoat of Resene Yehaa.
