## STYLIST TIPS

*The colour green is thought to bring balance and harmony; a palette bound to create a soothing interior space.*

*Not every room in your home needs to be styled in the same way. You can create calm and simple spaces and then have a fun, over the top bedroom.*

*Mix wood, white and a palette of earthy greens to create this Scandinavian vibe. Add a hint of lilac, the colour of the season, to complete the look.*

*If you're creating spaces with minimal accessories, invest in quality and comfort so that everything in the space is not only functional, but also beautiful.*

### STYLIST TIPS

*Floral and fun, if plain isn't your thing, go crazy in the bedroom where your personal style can reach new levels and the rest of the house can be a little more reserved.*

*Mix and match patterns by changing up the scale (large wallpaper pattern vs. small duvet pattern) and the style (floral vs. stripe) of the pattern.*

*Use block colour cushions to break up the mix of patterns and give some breathing space.*
