BERRY NICE

Building on the enduring popularity of soft, dusty pinks - which aren't going anywhere - a complementary new palette of Resene berry hues are the perfect way to add a mood-enhancing splash of colour to any space.

Offering a sense of warmth and comfort during cooler months, these deliciously daring shades look sophisticated when paired with cool, dark colours and work well as an accent.

From bright strawberry to rich raspberry or soft blackcurrant, a wash of berry in Resene SpaceCote Low Sheen also provides a luxe backdrop to showcase artworks and highlight the vivid greens of those beloved house plants.
