

HOME. Resene colour challenge

Dreams of a sun-bleached summer come alive, thanks to Resene.

STYLING / *Amelia Holmes*

PHOTOGRAPHY / *Toaki Okano*

HOME What was your inspiration for this shoot?

AMELIA HOLMES Because this is HOME's Summer Issue, I wanted to work with a really sun-drenched palette that spoke of the season. I was specifically inspired by ideas of surrealism, as well as a sense of sitting in a sun-drenched courtyard in the low summer sun.

HOME How did you choose the colours?

AMELIA HOLMES I wanted to experiment with the use of subtle gradations of colour instead of bright, high-contrast feature walls. I like how using two similar tones next to one another allows the colours to almost seamlessly blend into one another. The way the colours influence each other by being in such close proximity is fascinating too. 🍷

Take our lead and bring rooms to life with Resene fashion colours. Trends for summer reference beautifully sun-washed colours which, when selected tonally, work together in surprising combinations. Resene The Range fashion colours come complete with complementary colour suggestions. For information, visit the ColorShop nearest you, or resene.co.nz.
