

Colour & frame

Project & paint

Feminine frames

If you've been meaning to frame a beautiful print or photograph, why not do it with something that pops? This project is quick and inexpensive, and will make a striking addition to your home.

You will need

- Scissors • Sandpaper • Masking tape • Wooden frame with frame inner (we found ours at an op shop) • Resene testpots (we used Resene Pompadour, Resene Paper Doll and Resene Coral Tree)
- Ruler • Paintbrush • Roller tray and a print or photograph to fit

Step one Sand your frame down, getting rid of any varnish and leaving it with a smooth finish. Wipe down with a damp cloth.

Step two As a base, paint the frame in Resene Acrylic Undercoat. Leave to dry.

Step three Paint the frame in Resene Pompadour and the frame inner with Resene Pink Terrace. Leave to dry.

Step four Using the ruler, measure your print or photograph and cut to size.

Step five Frame up and enjoy your colourful piece of artwork.

Mural perfection

Now this is a statement for any space! If you have an uninspired wall that needs a dramatic transformation, get creative with this easy-to-do mural project.

You will need

- Projector • Thin and thick paint brushes • Resene testpots in colours of your choice • Sketching pencils

Step one Clean your wall before applying your paint. If the wall is plasterboard, use a sealer coat before painting. For our wall colour we used Resene Alabaster.

Step two Determine your desired size of your mural using the zoom function on your projector against your wall.

Step three Using your sketching pencil, trace out the linear pattern projected.

Step four Once your pattern is traced, follow your tracing with a black border, (we used a testpot of Resene All Black).

Step five Using your Resene testpots, colour in the sections of the mural pattern, double coating to achieve maximum impact.

Resene

the paint the professionals use

For all the supplies you need for these and all your home projects, call 0800 RESENE (737 363), visit your Resene ColorShop or www.resene.co.nz
