

# Safe under foot – rain or shine

Now you can keep non-skid surfaces safe in all weathers with Resene Non-Skid Deck & Path

A passing shower of rain or a splash from a swimming pool can be all it takes to make previously non-slip outdoor surfaces wet and slippery.

It's a problem for any outdoor living area, but Resene has developed a solution to keep these areas safe in all weathers. Resene Non-Skid Deck & Path is designed to provide a comfortable walking surface for all interior and exterior settings where a non-skid finish is desired, including decks, steps, paths and pool surrounds.

The finish has a grit texture, which

provides a good grip for feet and shoes, reducing the risk of accident.

Resene Non-Skid Deck & Path has a low-sheen finish and can be tinted to complement an existing colour scheme. Contrasting colours can also be used to create decorative effects in courtyards, either as part of a new landscaping plan or

to rejuvenate weathered surfaces.

Resene says the product is easy to apply and high-traffic areas can be upgraded and coloured with minimal disruption.

The house featured on this page also showcases another Resene product – Resene Lumbersider, a satin acrylic that can be used on most outdoor surfaces.
