

Pebble mosaic

Make a pretty glass pebble pot.

You will need:

- Bowl-shaped terracotta pot
- Paintbrush
- Weldbond PVA glue
- Resene Terracotta sealer
- Resene testpot of Resene Alabaster
- Resene Multishield+ (gloss)
- Clear, opaque and white glass pebbles (our's came from Mitre 10 Mega)
- Good quality potting mix
- 3 white cyclamen plants

To get the look: Mark painted the background wall with Resene Lumbersider tinted to Resene Paua.

1

Apply one coat of Resene Terracotta sealer to the inside and outside of the terracotta pot and allow to dry for six hours.

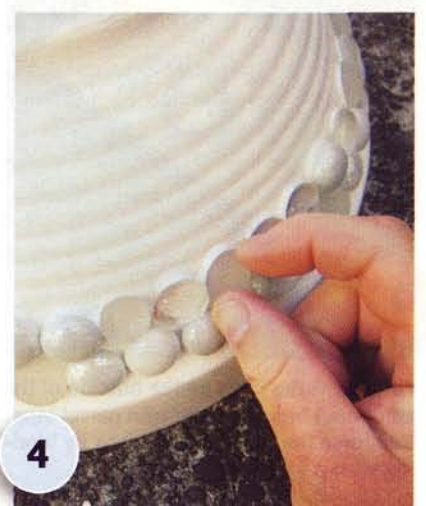

2

Apply two coats of Resene Alabaster to the outside and inner rim of the pot, allowing two hours for each coat to dry.

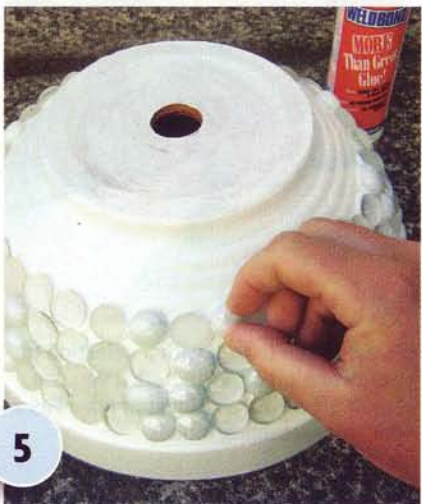

3

Working with the pot upside down, attach one row of glass pebbles, as shown, fixing each one with a generous blob of PVA glue.

4

Apply a second row of pebbles above the first.

5

Apply a third and fourth row of pebbles around the pot, as shown.

6

Continue working in this way until the pot is covered in glass pebbles. Leave to dry overnight.

7

Apply one coat of Resene Multishield+ to the outer and inner rim of the pot, allowing two hours to dry.

8

Pot up with three white cyclamen plants and good quality potting mix.
