

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Weekend DIY with Mark Rayner – 76

It's easy to transform a tired timber fence into a stylish feature with a little bit of help from Resene.

You will need:

- Bucket
- Garden hose with water supply
- Paintbrush
- Paint stirrer
- Resene Lumbersider tinted to Resene Helium
- Resene Moss & Mould Killer
- Resene Timber and Deck Wash
- Resene Quick Dry
- Rubber gloves
- Stiff-bristled brush
- Timber fence

Step 1
Mix one part Resene Moss & Mould Killer to five parts clean water.

Step 2
Wearing rubber gloves, generously apply the solution to the fence with a stiff-bristled brush and leave for 24 hours.

Step 3
Mix one part Resene Timber and Deck Wash to three parts clean water.

Step 4
Wearing rubber gloves, scrub the solution into the timber fence with a stiff-bristled brush and rinse off with clean water. Allow the fence to dry.

Step 5
Carefully stir the Resene Quick Dry with a large paint stirrer.

Step 6
Apply one coat of Resene Quick Dry to the fence and allow to dry.

Step 7
Carefully stir the Resene Lumbersider tinted to Resene Helium with a large paint stirrer.

Step 8
Apply two coats of Resene Lumbersider tinted to Resene Helium to the fence, allowing two hours for each coat to dry.

To get the look:
For added contrast, Mark painted the posts and top capping with Resene Lumbersider tinted to Resene Alabaster.

Other ideas:
For a soft creamy effect paint the fence with Resene Lumbersider tinted to Resene Pipi.
